

Lunch 'n Learn 6: Navigating CIDP: Diagnosis, Treatment, and the Road Ahead

Tuesday, June 11, 2025 - 12:00 PM – 1:30 PM Eastern

Rogers Centre Ottawa, Level 6, Room 208

Faculty: Hans Katzberg • Zaeem Siddiqi • Vincent Picher-Martel

Description:

CIDP management is evolving—are you keeping up? Explore the latest diagnostic strategies, uncover gaps in current treatment approaches, and discover how emerging therapies may change the landscape. Gain expert insights through real-world case discussions and practical clinical guidance. Don't miss this chance to refine your approach and improve patient outcomes!

Learning Objectives:

- Differentiate chronic inflammatory demyelinating polyradiculoneuropathy (CIDP) from related neurological disorders by applying current diagnostic criteria
- Formulate personalized, evidence-based management plans to enhance the care of patients with CIDP, addressing gaps in current therapeutic approaches
- Evaluate emerging therapies for CIDP based on their mechanisms of action and clinical trial data, with a focus on targeting the neonatal Fc receptor (FcRn)

Audience: Adult Neurologist, Resident, Fellow, Nurses with interest in topic

Learning Level: Basic (Resident, New Information), Intermediate (Practicing Physician), Advanced (Special Interest, Higher Level Discussion)

Learning Format: Audience response system, Case studies, Discussion group/peer exchange/user groups, Forum/panels, Question and answer sessions

Time	Presentation Title	Name of Speaker
12:00 PM ET	Introduction	
12:10 PM ET	CIDP Overview	
12:30 PM ET	Treatment Planning: Personalized Strategies & Case Discussions	
12:50 PM ET	The Future of CIDP Treatment	
1:10 PM ET	Summary, Q&A, and Post-Test	

This program was developed by the CNSF and argenx Canada and was planned to achieve scientific integrity, objectivity and balance. It is an unaccredited learning activity and not eligible for MOC credits.
